

The business world  
changes in  
unpredictable ways...

Be prepared.

## C&W Cloud Infrastructure

**Cloud Infrastructure** is C&W's answer to Infrastructure as Service (IaaS) needs.

**Cloud Infrastructure** delivers all the benefits and flexibility of cloud computing, without upfront investments.

**C&W Cloud Infrastructure** allows organizations to construct their own "private cloud", with server configuration customized to meet specific needs, vision and budgets. With simple monthly fee based on the computing power, storage, amount of space and bandwidth used and with the flexibility to add or reduce processing power, expand storage space or upgrade other features as required, all size businesses can cost-effectively move into the cloud, **C&W Cloud Infrastructure** gives organizations more control over operations, simplifies the complexities of IT and streamlines expenses.

**C&W Cloud Infrastructure** is deployed in the C&W Data Center Fabric with multiple state-of-the-art datacenters in the region.

There is no cloud computing without reliable connectivity. C&W provides unlimited bandwidth capacity and flexible network designs for businesses of any size to connect locally, regionally or internationally. Boasting close to 42,300 kilometers of submarine optical fiber, interconnection among 42 countries, and local operations and networks in multiple Latin American and Caribbean countries, C&W can provide you connectivity wherever you are in the region. You will face no limitations in terms of bandwidth.

In a fast-moving business world,  
IT cannot be left behind.

The customers of C&W Cloud Infrastructure  
enjoy these key advantages:

- World-class connectivity and unlimited capacity, without upfront investment.
- Scalable access, with unlimited bandwidth capacity to connect locally, regionally or internationally.
- Enable business innovation by significantly lowering the risk premium of IT initiatives.
- Predictable and cost effective monthly pricing.
- Data security, supported by the C&W eco-system.
- Business continuity, without interruption during any disaster, threat or business disruption.
- Rapid provisioning of capacity on demand (ex: seasonal, end of month/quarter, marketing promotions, migrations, etc.)

When utilizing IaaS, you can overcome IT's  
biggest challenges:

- No more technological cycle nightmares.
- Costly upgrades become nearly obsolete.
- Maintenance management is no longer an issue.

Build your private cloud on your terms.

C&W Cloud Infrastructure allows server configuration to fit almost any need. Whether you add or reduce processing power, need more storage space or additional features, the cost will reflect the services you use.
