C&W Enterprise Virtual Desktop

Secure access to all functionality, data, and applications on your desktop from any device.

Enterprise Virtual Desktop is a turnkey solution that includes virtual desktops and end-user devices (optional) enabling mobility and increasing employee productivity, while reducing the costs for supporting and upgrading the desktop estate.

Enterprise Virtual Desktop offers the conversion of any device into a fully functional work station. Data and applications are run and stored in our world-class datacenters with a high-availability infrastructure and network. This ensures access, control, and security for your business processes.

Enterprise Virtual Desktop integrates tools for monitoring and automating deployment of desktops and applications, allowing IT Managers and the Help Desk to manage the user experience.

Enterprise Virtual Desktop integrates seamlessly with existing corporate applications, providing users with the same interface on all devices.

Services
