

Managed Wi-Fi AT A GLANCE

- ✓ Easy to connect to
- ✓ With indoor/outdoor access points
- ✓ Location based analytics
- ✓ Wi-Fi security options

Benefits

High density areas
Optimized for 100+ guests
per access point

Large campuses
Centrally managing thousands
of wireless access points

Remote branches
Built-in multi-site management

One management
A single pane of glass

BYOD ready
Supports any type of wirelessly
connected device

High-performing Wi-Fi EVERYWHERE

A robust wireless platform that works great EVERYWHERE. You can enable a single SSID for all your properties; this way, your guests don't need to switch from one Wi-Fi to the next when they move around.

You can also optimize your hotspot coverage to make sure there is always great signal strength, regardless of geography or user count.

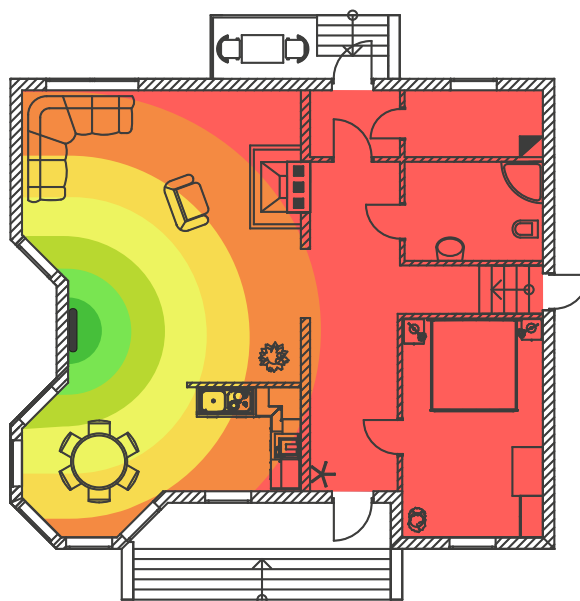

The Opportunity to Monetize "Access"

Charging per use

Or convenience

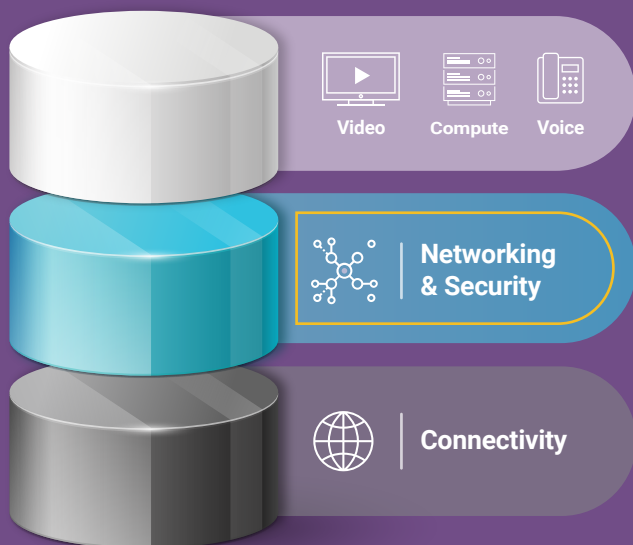

You can create social logins to figure out who your connected guests are! It's a smart way to build more accurate profiles of your guests.

You can also leverage your connected user base and push notifications onto them, implementing all sorts of upsell strategies.
