C&W Business

Secured
Enterprise
Applications

Be assured that your applications are safe at every touch point
We'll make sure:

✓ E-mail is secure
✓ Users are rightfully authenticated
✓ Permissions are properly set
✓ Access ports are restricted
✓ Transaction records are clean

Benefits

Minimizes overall security risks

Reduces application downtime, and protects your digital assets

Reduces emergency and remediation costs

Short implementation cycles — our SOC will speedily make sure all your applications are secure

Simple pricing model

Features

- Advanced threat management — continuously scans the network for vulnerabilities and threats

- Email security — protects against phishing, spam, and ransomware

- Secure app authentication — supports multiple authentication protocols, directory services, and permission-setting mechanisms

- Web application protection — port blocks, traffic filtering, and audit trails

We manage secure networks throughout our markets with best-of-breed software and hardware solutions, a state-of-the-art ISO 27001:2013 certified SOC and a CSC providing continuous monitoring 24/7.
